

Hand Tools

PLIERS THAT AUTOMATICALLY ADJUST TO ANY SIZE OBJECT

THAT'S A LOCKJAW REVOLUTION

No more manual adjustment

Rugged steel construction

NO KNOB
NO HASSLE

The Lockjaw™ Auto-Grip™ Self-Adjusting Groove Pliers are a true innovation in hand tool technology. Simply close the handles and the jaws automatically adjust to parallel on any size object!

- No more manual guesswork and no more time-wasting back and forth to find the correct groove.
- The LockJaw™ Auto-Grip™ is fully automatic for true one-handed operation!
- The rugged, industrial grade construction combined with ergonomic grips and a lifetime warranty make this a must-have to get the job done.

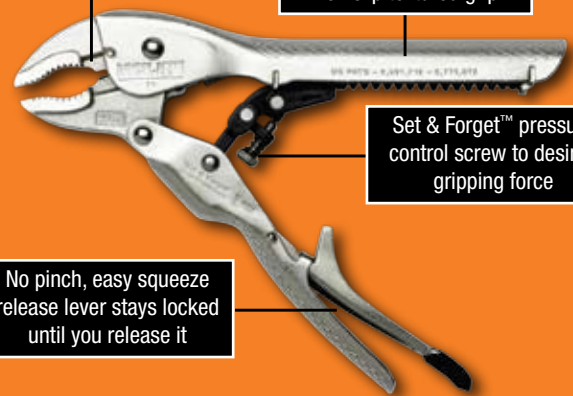

SELF-ADJUSTING PLIERS
LOCKJAW™
Automatically Locks On Any Size

Wire cutting feature through releasing pressure control screw*

Non slip textured grip

Set & Forget™ pressure control screw to desired gripping force

No pinch, easy squeeze release lever stays locked until you release it

- Set & Forget™ Clamp Pressure - Dial in clamp pressure from light to extreme and forget it.
- Five times faster automatically locks any sized object with the same pressure.
- Chrome Molybdenun steel for durability and rust prevention.
- Rugged industrial locking mechanism.
- Easy one handed use.

Pin Punches
A pin punch is used as a driving tool, typically, as the name implies, to drive pins that are used to affix a fixture to a rotating shaft.

Centre Punches
Typically used as an aid to drilling operations. A drill will have a tendency to wander on the surface until it gains sufficient purchase to start cutting a hole.

Nail Punches
A nail punch is a short steel rod, usually tapered; used to drive a nail or brad below, or flush with, a wood surface.

Roofing Punch
Mainly used for piercing holes through corrugated steel roofing.

Flooring Punch
Over a period of time the flexing of the floor or expansion and contraction of the timber may loosen the floorboard nails. These punches are designed to re-secure the nails into the timber.

Cutting Fluid

Lubricating Fluid is a medium viscosity metal cutting liquid for use in reaming, tapping, drilling and other metal cutting operations.

Sutton Tools Lubricating Fluid has been specifically formulated to -

- Dissipate heat from both the tool work piece
- Act as a lubricant between the tool and the work piece
- Extend tool and die life by reducing wear
- Improves thread and surface finish
- Remove swarf from the cutting edge
- Flows to cutting edge
- Excellent penetration into deep holes and slots

Apply Lubricating Fluid to work piece prior and during machining process.
